SUMMARY

I am a motivated Computer Science Engineering student with a solid foundation in programming and web development. I have experience in full-stack development, notably with projects like the Virtual Interview Practice App and the Gemini Chatbot Clone. I thrive in creative environments and am passionate about leveraging technology to solve real-world problems

Bachelor of Technology   CGPA : 8
Rungta College of Engineering and Technology
📅 08/2021 - 05/2025   📍 Chhattisgarh, India

Higher Secondary School (XII)   83% | 2021
MGM Senior Secondary School
📅 01/2019 - 12/2021   📍 Chhattisgarh, India

Secondary School (X)   83%|
2019
MGM Senior Secondary School
📅 01/2017 - 12/2019   📍 Chhattisgarh, India

TRAINING

Full Stack Developer
SEED IT SOLUTION   📍 Bhilai, Chhatisgarh

Seed IT Solution is in a Bhilai-based professional institute that offers practical training in web development and software engineering, emphasizing real-world projects and expert-led guidance.

- Completed hands-on full stack web development training at Seed IT Solutions, covering HTML, CSS, JavaScript, React.js, Node.js, Express.js,
  PHP, and MySQL
- Gained practical experience in building responsive, database-driven web
  applications with real-time functionality and RESTful API integration.
- Worked on multiple real-world projects under expert mentorship, focusing on both frontend and backend development, user authentication, and deployment practices.

PROJECTS

Gemini Clone

Gemini Clone

Tech Stack**:** React.js | Gemini Pro API

- Developed a Gemini chatbot clone using React to simulate AI-powered conversations
- Integrated Google's Gemini Pro API to fetch real-time, intelligent responses based on user input
- Managed app state using React Context API and stored user prompts and results dynamically

Virtual Interview Practice App

Virtual Interview Practice App

Tech Stack: React.js | Node.js | Express | MongoDB | OpenRouter API

- Developed a full-stack web app where users answer common interview questions and receive AI-generated feedback and ideal responses
- Integrated OpenRouter API (GPT-4) to evaluate answers and generate personalized feedback along with high-quality model answers
- Built a dynamic prompt system to support multiple types of behavioral and technical interview questions
- Designed a clean, responsive frontend using React for seamless user interaction
